

FILMMAKING

WITH STOP MOTION STUDIO

FULL SAIL
UNIVERSITY

Workshop Description

After exploring the preproduction, production, and post production aspects of the film industry, students will then be challenged to create their own stop motion projects. They will work in groups to combine their creativity into one cohesive story, and “pitch” their ideas to the class.

Workshop Length

This workshop experience can be adjusted to accommodate **45 - 90 minute** class schedules.

Learning Goals

At the close of this workshop, participants will be able to:

Identify stop motion principals and industry terminology

Create a 40+ frame stop motion short video clip by completing the following **four objectives**:

1. Determine a storyline for a scene
2. Navigate the Stop Motion Studio Application
3. Capture frames with the characters provided
4. Add audio components, theme song, and titles

Set-up & Preparation

All supplies, including iPads and toy characters, will be provided by our facilitator for this workshop and we can present throughout the day to accommodate multiple classes. Teachers are also welcome to select a different workshop experience for each class.
