

STOP MOTION ANIMATION

WITH KAPWING

FULL SAIL
UNIVERSITY

Virtual Workshop Description

Create a multi-frame stop motion video clip using Kapwing. Organize the frames into the right sequence and correct the frame rate to have a finalized stop motion project.

Virtual Workshop Length

This workshop can be completed in **45 - 60 minutes**

Learning Goals

At the close of this workshop, participants will be able to:

Identify stop motion principals and industry terminology

Create a 48 frame stop motion short video clip by completing the following **three objectives**:

1. Navigate the Kapwing Website
2. Organize the frames into the right sequence
3. Correct the frame rate of the project to the fastest speed

Set-up & Preparation

Prior to the start of this workshop and for a more engaging experience, attendees can actively participate by creating a free account with Kapwing found here - <https://www.kapwing.com>. Alternatively, attendees can also follow along by simply watching the facilitators screen.
